

Iuri Radulov

Senior Full-Stack Engineer | PHP Laravel, React Next.js

Summary

Full-stack engineer with more than 4 years of commercial experience in PHP and Laravel and more than 5 years in web development overall. I build and operate e-commerce and SaaS products for the US and EU markets end to end: data model, REST APIs, admin panels, deployment and production support. Payments are my strongest area: three gateways in production (Cardstream, MAIB, Stripe) with the full lifecycle, hosted flows, webhook signature validation, idempotency keyed by the gateway reference, retries, rollback and a nightly reconciliation of gateway captures against the database. I work AI-native: Cursor, Claude Code and Codex as a standard part of the workflow, with review of every change before it ships. Open to relocation to the EU (Romania, Cyprus).

Commercial project experience

1. ProFarma Express

E-commerce platform for a US online pharmacy. Laravel backend with a Filament admin panel, Vue and Nuxt storefront, Cardstream payment gateway with hosted flow, idempotency and a nightly reconciliation, PostgreSQL and MySQL. Ongoing maintenance.

2. Unboxed Fillers

E-commerce store for dermal fillers and injectables on the US market (USA, EU and South Korea suppliers). PHP, Laravel, Filament admin panel, React, SQL.

3. BizEntry

Platform that guides founders through opening and registering a business in the USA. Laravel, Filament admin panel, API and payment integrations, PostgreSQL.

4. Vitra

E-commerce website with a full admin panel for the company Vitra. Laravel, Vue and Nuxt, MySQL, MAIB bank payment integration.

5. HRM

HR platform for employee management: roles, records and internal workflows. Laravel and Filament.

6. Tracking Service

Platform for tracking parcels shipped to America, with statuses and reporting. Laravel and Filament.

Own products, built from zero to production

1. AI Povesti

AI product that generates illustrated fairy tales: text, images and voice-over in an end-to-end pipeline, with PDF export. Next.js, Python FastAPI, Stripe and MAIB payments, multi-region (Romanian and Russian).

2. AI Interview Trainer

SaaS for preparing technical interviews: landing page, web app, Telegram Mini App and Telegram bot. Laravel, Next.js, Python, Stripe subscriptions and AI voice.

3. Career Path Simulator

AI career guidance platform for schoolchildren and students: interactive quizzes and AI role-play. Next.js, Python FastAPI, localization, Telegram Mini App.

Portfolio

Work Experience

Full-Stack Developer **WEB NG Global**

February 2025 - Present | Moldova

- Building and maintaining e-commerce and business platforms for the US and EU markets with Laravel, Filament, Vue, React and Next.js.

Portfolio
Chisinau, Moldova (open to relocation to the EU)

Tech Skills

- PHP, Laravel, Filament
- JavaScript, TypeScript, React, Next.js
- Vue.js, Nuxt, React Native
- Node.js, Python (FastAPI)
- PostgreSQL, MySQL, SQLite, Prisma
- Redis, MongoDB
- REST API, webhooks, payments
- Stripe, Cardstream, MAIB
- Docker, CI/CD, Git, GitHub
- AI-assisted development: Cursor, Claude Code, Codex
- HTML, CSS, SCSS, Tailwind
- WordPress

Soft Skills

- Ownership and reliability
- Clear communication of trade-offs
- Code review and mentoring
- Critical thinking, problem solving
- Continuous learning

Language Skills

- Russian - native
- English - B2 (Upper-Intermediate)
- Romanian - upper-intermediate
- Turkish - intermediate

- Payment gateways in production: Cardstream hosted flow, webhook signature validation, idempotency keyed by the gateway reference, retries, rollback and a nightly job that reconciles gateway captures against orders in the database.
- Relational databases, PostgreSQL and MySQL: schema design, migrations, indexing and query optimisation.
- Docker and CI/CD delivery, code review and production support.

Full-Stack Developer **Vitra**

February 2024 - February 2025 | Moldova

- E-commerce platform: frontend, backend and admin panel with PHP, Laravel, MySQL, JavaScript, Vue and Nuxt.
- MAIB bank payment integration, from payment creation to callback handling and order status changes.
- Interviewed candidates for developer roles and supported the selection process.

Full-Stack Developer **Customagic**

May 2023 - February 2024 | Moldova

- Refactoring and extending existing client websites using HTML, CSS, JavaScript and PHP.
- Frontend, backend and admin panel development with PHP, Laravel, SQL and React.
- Mobile applications with React Native.

PHP Developer **Webmaster Studio**

March 2023 - May 2023 | Moldova

- Backend and frontend development for client projects using PHP and MySQL, including admin panel setup.

PHP Developer **Amid-auto**

September 2022 - February 2023 | Moldova

- Built and refined the company store website with Laravel and Vue.
- Administered and supported the website in production.

Freelance Full-Stack Developer **Self-employed**

2021 - 2022 | Remote

- Delivered client websites end to end: design implementation, frontend, backend, release and post-release support.
- Built an excursion booking website for a Norway tour operator (React, Redux, Bootstrap) and small business websites on client order.

Education

Technical University of Moldova

Electric power Engineering

September 2003 - June 2007 | Moldova

Additional Education

IT School GoIT

Full stack developer

September 2021 - September 2022 | Ukraine
